1.0 OBJECTIVE

The objective of these architectural guidelines is to ensure the very highest standard of visual appeal and image; ensuring compatibility among homes and integration of the community into the natural landscape. Outlining the opportunities and constraints of building, these guidelines will assist builders, designers and home buyers in achieving problem free construction.

2.0 STREETSCAPE

Care must be taken to integrate the unique values of each home with special attention to the relationship with neighboring properties. Relative massing, siting and style will be of utmost importance in assuring each home compliments it's' neighbor and the subdivision. Building massing, siting and style may be adjusted and/or alternate treatments requested to reinforce the streetscape. Entranceways will be covered at a level that encloses and protects the space, at the first level or a height proportionate to the design. The style, width, height and detailing of entranceways will together create a sense of arrival.

3.0 HOUSE SIZE

Houses are to have a consistency of mass and volume within the streetscape. As such, house widths and sizes must relate proportionately and logically to the lot width and neighboring houses.

Homes will be reviewed on their individual merits of design, massing, proportion, and compatibility.

4.0 SITE PLANNING AND GRADING

Site planning and grading must accommodate the natural slope of the land with variations in grade absorbed within the building mass as much as possible. Lot grading must be in strict conformance with the approved grading plan for the subdivision.

Special attention is to be given the treatment of exposed concrete foundation walls. A maximum of 2'0" of parged concrete will be permitted on all elevations of the home. Variation in grade and basement design may require cladding material be lowered or extended to within 2'0" of ground level.

Front entry steps are to be a maximum of three risers per set. Where the grade calls for more than three risers, the run must be split. Exceptions to this requirement may be granted in consideration of unique design, topography and lateral bracing concerns. If there are more than three risers per set, the step will be a minimum of 4' wide with appropriate railing style.

Additional setbacks may be required to articulate and provide streetscape differentiation to all proposed home. Homes will be reviewed on their individual merits of design, massing, proportion and compatibility and, where the Architectural Consultant considers the plan to be exceptional, and, provided that the house conforms to the general trend of the neighborhood, exceptions may be considered.

5.0 GARAGE/DRIVEWAY

All homes must be provided with a rear detached garage, constructed with the home and located in accordance with the garage location plan. Homes should be designed to integrate the garage and minimize its appearance while enhancing the mass of the house itself. Some of the architectural measures that can achieve this are proportionate development of the second floor above the garage and an emphasis on entrance

treatments. Overhead doors shall be finished in the same color as the wall cladding. The height between the overhead door and eave line should be kept to 2'0". Where the design exceed 2'0", special treatment is required. Front driveways and walkways may be constructed of concrete, including plain, stamped and colored concrete, colored concrete pavers and exposed or washed concrete. Where colored concrete or pavers are utilized, the color must be expressly approved. The front walkway must be a minimum of poured concrete in broom finish. Individual patio blocks will not be permitted.

6.0 IDENTICAL ELEVATIONS

Identical elevations will be permitted on adjacent lots in the Duplex site for semi detached units. The rear elevation of all units backing onto the greenbelt/walkway will incorporate roof lines and detailing to effectively break up the façade and add visual interest.

7.0 EXTERIOR COLORS

Colors will be approved on a lot by lot basis without repetition on adjacent lots. The use of a third accent color is required.

The overhead garage door must be painted to match the wall cladding.

8.0 CORNER LOTS

Houses on corner lots require special design consideration. Flanking side elevations should have suitable front elevation treatments with principal roof planes sloping towards view. All models will be considered for corner lots based on their unique suitability to these locations. Two story models will be considered only if it is demonstrated that the design is suitable in massing and style. For two story models this may include variation in wall planes, roof at second floor set back of main floor to provide substantial roof mass between floors, appropriate wall heights, window placement and use of detailing.

9.0 HIGH VISIBILITY LOTS

Lots including and in between Lot 45 to Lot 66, Block 11 are to have high visibility and require special design consideration. These elevations must incorporate attention to detailing consistent with the front elevation and the overall design. The lots affected in Stage 7A will be those backing onto the park, and greenbelt amenities.

10.0 ROOFING

Roof slopes will be a minimum 6/12. Roof pitch on a Bungalow design will be a minimum of 7/12 and may be required to be increased to ensure an acceptable streetscape. Eave overhangs are to be proportionate to the design of the home. Cantilevers and boxouts on visible elevations (front, corner, and perimeter lots) must include their own roofline and overhang. All fascia boards are to be a minimum of 8".

Roof material is to be either:

- IKO 25 Year Shingles in the following colors: Weatherwood, Driftwood, Dual Black or Charcoal Grey.
- BP 25 Year Shingles in the following colors: Weatherwood, Charcoal Grey, Sandstone, or Slate Black.

All furnace and fireplace chimneys must be contained in a corbelled chase.

11.0 EXTERIOR FINISHES

The use of window and door surrounds and/or a combination of battens, trim boards, louvers, and brick or stone will be a feature on all homes. It is the intent of this clause to ensure all openings visible from the front street will be detailed with appropriate trim.

Brick or stone (masonry) is required on each home in a panel effect. The full front of the garage should be finished in masonry. As an alternate, the brick or stone may be used to a minimum 75% of the wall height if appropriate to the design. All entries shall be accented with brick or stone.

Permitted cladding materials include vinyl siding and wood siding in horizontal application, brick/stone in stacked application, stucco, and Stonetile.

All trim and masonry details must be returned 24" around corners.

Parging not to exceed 2'0" on front and corner elevations.

An emphasis on entrance treatments is a requirement. Such treatment may include the use of verandahs, courtyards, and covered entries. Where the design does not lend itself to this concept, the use of alternate detailing and feature windows will be considered.

12.0 FENCING

Wood fencing acceptable on all lots shall be consistent in design and color with the fencing style established for the community, an illustration of which is attached.

12.1 LANDSCAPING/LANDSCAPE DEPOSIT

The party who is responsible for landscaping the front yard is to be confirmed between the Purchaser (builder) and the homeowner. In the case of corner lots, the front yard shall include the flanking side yard to the sidewalk, curb or boulevard and to the rear corner of the house.

In the situation the homeowner shall be responsible for landscaping the front yard a Landscape Deposit in the amount of \$1,500 for each lot shall be paid to the Purchaser (builder) by the homeowner. Upon completion of landscaping, the Builder shall call for inspection by the Vendor's Consultant. If upon inspection the Vendor's Consultant determines that the landscaping has not been satisfactorily complied with, there will be a charge of \$150.00 deducted from the Landscape Deposit for all re-inspections required. Upon approval of the landscaping requirements herein and satisfaction of other terms relating to the Landscape Deposit, subject to deductions made, the Vendor will refund the Landscape Deposit to the Purchaser, or if the Landscape Deposit is collected by the Purchaser from its homeowner, the Vendor will authorize the Purchaser to release the Landscape Deposit.

The minimum standard shall consist of sod, one tree and a shrub bed containing at least four shrubs. Deciduous trees shall be a minimum 2" caliper, coniferous trees a minimum 6' tall and shrubs shall be 2' in height. All landscaping must be completed, in accordance with the requirements, within six months of completion of the house (subject to seasonal limitations).

12.2 LANDSCAPE DEPOSIT

The landscape Deposit will be paid to ensure, inter alia compliance with these design guidelines. The amount of the Landscape Deposit to be paid will be \$1,500 for each Lot which sum will be paid to the Purchaser (builder) by each homeowner as set out in

13.0 ANCILLARY BUILDINGS/GARDEN SHEDS

The side wall elevations of all ancillary buildings and garden shed shall not extend higher than adjacent fencing. Where such structures are visible from public adjacencies (i.e., all perimeter lots, corner lots and lots backing onto the lake), exterior wall finishes, style, and color shall compliment those used on the house. Roof style and materials are to match the materials used on the roof of the house.

14.0 INTERPRETATION

The enforcement, administration and interpretation of these guidelines shall be at the discretion of MLC Group or its designated consultant. The unfettered application of these guidelines shall be without notice or precedent.

15.0 SITING

15.1 Consultant

Check with the Architectural Consultant for all applicable drawings, and any special conditions.

15.2 City Regulations

Ensure that city regulations are met and note relevant plans regarding utilities and rights of way.

15.3 Grading

Check Building Grade Plans and conform to them. Do not grade to existing vacant lots or unfinished lanes, but to elevations provided.

15.4 Plot Plans

A designated surveyor shall prepare all plot plans and perform all stakeouts in the subdivision to facilitate establishing building elevations that are consistent and appropriate.

16.0 SUBDIVISION APPEARANCE

16.1 Signage

In order to maintain cohesiveness for signage within the subdivision, all signage will be supplied by the Developer, i.e. all model signs, directional signs and general information signs. The only signage to be supplied by the Builders Group will be on lots owned or sold by that Builder. Excessive abuse of signage, including sandwich boards may necessitate removal of ALL Builder and Realtor signs.

16.2 Excavation Material

All Builders must ensure that all excavation is kept within the confines of their lot. Any spillage on a road, land, sidewalk or neighboring lot must be removed immediately or the Developer will arrange for its removal and invoice for expenses.

16.3 Clean Up

Builders should encourage timely removal by all subtrades of litter on building sites. Failure to comply will result in a clean-up bill being charged to the lot. Supply of bins by the Builder is recommended. Any general clean-up of the subdivision implemented by the Developer can and will be charged pro-rata to all builders.

16.4 Construction Activity

Each Builder is responsible for inspecting the condition of curbs, sidewalks, street lights, services, etc. on his lot and must submit written notice of any damages to the Developer (within 21 days of purchasing the lot) prior to commencing construction, otherwise costs for repairing any damages becomes the sole responsibility of the Purchase/Builder.

17.0 APPROVAL PROCESS

Prior to building the Builder inspects the lot and all services. All discrepancies or damage to be reported in writing with the application and copy forwarded to the Developer.

Before applying to the City for a development permit, the applicant shall submit plans for approval of WINDWARD LANTEC INC. Application shall include the following:

- a) One complete set of house plans;
- b) Two Copies of the Plot plan, prepared by Stantec Geomatics, showing lot house grades and drainage pattern, floor and garage elevations; and
- c) Completed application form.
- d) Material and color samples, as required.

WINDWARD LANTEC INC. will review the plan and recommend approval, modification, or rejection of the application based on the adherence of the plans to these guidelines. Should disputes arise, the Developer shall make the final decision on the acceptability of plans. Once approved, WINDWARD LANTEC INC. will send a copy of the application indicating any changes to the applicant. After approval, the plans may not be altered without prior approval of WINDWARD LANTEC INC. WINDWARD LANTEC INC. will keep an up-to-date record of plans showing house types, color, roof lines and grades, to advise the applicants of how their proposed house will best fit into the existing situation.

Approval of any and all house plans will be at the sole and unfettered discretion of the Developer.

No stake-out will be granted until approved by WINDWARD LANTEC INC.

18.0 DAMAGE DEPOSITS

The Builder shall supply a damage deposit or Letter of Credit in the amount of \$5,000.00 (regardless of the number of lots) is due prior to house plan and grade approval to cover:

1. Contravention of architectural objectives.

2. Possible damage to:
 - (a) Curb stop - water valve
 - (b) Sidewalks, curbs and gutters
 - (c) Driveway aprons and asphalt
 - (d) Boulevard landscaping and trees
 - (e) Rear gutters and walkways
 - (f) Light standards
 - (g) Fire hydrants
 - (h) Cathodic Protection points
 - (i) Grading and drainage swales
 - (j) Fencing

18.1 Deposit Return Procedure

1. Exterior completed in accordance with these guidelines and as approved by the architectural consultant.
2. Landscaping satisfactorily completed as per requirements.
3. Rough grading certificate & city approval of same, from the City of Edmonton Drainage Branch.
4. Water valve exposed and marked.
5. Sidewalks, street, lane, gutters and curbs cleaned.
6. Application made in writing to WINDWARD LANDTEC INC. (form attached).

Upon completion of construction, site works and landscaping, a final inspection is done to ensure compliance with the architectural guidelines and to check for any damages to municipal improvements. The following items must be completed prior to a request for final inspection:

- * Home constructed in compliance with the Guidelines and the approved plan
- * Construction complete including seasonal work on exterior, site cleared of all debris, sidewalks and curbs cleaned, cc marked and exposed
- * Landscaping completed in accordance with guideline requirements
- * Grading certificate for rough grade is provided with City approval

To initiate the final inspection, a request form accompanied by the approved grading certificate must be forwarded by the builder to Windward Landtec Inc.
